Collected Papers from the Research Laboratory Volume 3

By Davis And Co Parke

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1915 Excerpt: .the physical condition as well as chemical constitution of the food, directed attention to the processes of digestion. It soon became clear that the various ferments given off by the digestive glands were able to split the complex food molecules into less complex ones with the absorption of water. Since many of these combinations are of a colloidal nature, and, therefore, unable to pass the animal membranes, it is supposed that these substances are split up into still simpler components until their physical and chemical characteristics make them dialyzable to these membranes. Exact study of the processes of digestion as going on in the gastro-intestinal tract, brought out the fact that the highly complex molecules are broken down in the process of digestion into their component parts. Thus we find in the intestine components which result when polysaccharids, fats, albumens, and nucleoproteids are broken down with...
