What is needed is a 'system that enables organizations to capture, analyze, share, apply, and reuse knowledge' (Cho et al, 2000:2-6). Using a Knowledge Management framework presented by Cho and colleagues, this study will demonstrate a process to generate, organize, and develop expert knowledge as a means to minimize knowledge loss due to turnover. The methodology presented in this thesis is a four-step, tailored approach to identify tasks or processes important to the functioning of an organization, capture knowledge from experts pertaining to those tasks (generate content), convert that knowledge into a flowchart (organize content), and have experts critique the end product to ensure accuracy and usefulness (develop content). The methodology capitalizes on proven knowledge elicitation techniques for the generation of knowledge and a commercial-off-the-shelf...
