There is a secret about financial security that has been hidden from the general public. If known, it would take a huge bite out of the profits of many Wall Street firms, the very same firms whose revenues depend upon peoples lack of understanding financial arithmetic. Armed with this information, almost anyone, even people earning ordinary incomes, are virtually guaranteed a high six, or even seven-figure retirement nest egg without changing their lifestyle or purchasing risky investments. The secret has been so closely guarded by the financial community that youve never heard of it. No bank, mortgage lender, stock brokerage firm, or financial advisor will discuss the secret with their clients. After all, if a big chunk of your income depended upon your customers being kept in the dark, would you tell them? Could a code of silence exist on such a grand scale? It could, and it does. Heres just a taste of what they dont want their clients to know: You can pay off your 30 year mortgage in about 10 years and save hundreds of thousands of dollars, without changing your monthly payment - and no, its not a bi-weekly mortgage. Instead of investing early in a brokerage account, your IRA or 401(k) will grow MUCH larger if you dont! You dont have to settle for puny market returns. Your net worth can grow by 250 to 600, and with zero risk to principal! This book not only reveals this secret, but also tells you exactly how to put it to work to grow a larger nest egg than you ever thought possible. This item ships from La Vergne, TN. Paperback.
