

Wanderung Nach Dem Orient Im Jahre 1838

Filesize: 4.12 MB

Reviews

This pdf is indeed gripping and interesting. It is definitely simplistic but shocks within the 50 percent of your book. Once you begin to read the book, it is extremely difficult to leave it before concluding.
(Michael Spinka)

WANDERUNG NACH DEM ORIENT IM JAHRE 1838

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 48 pages. Original publisher: Champaign, IL : US Army Corps of Engineers, Construction Engineering Research Laboratory ; Springfield, VA : National Technical Information Service, distributor, 1999 OCLC Number: ocm44788326 Subject: Military bases -- Environmental aspects -- United States. Excerpt: . . . CERL TR 99 64 15 Schwertmann 1981). R factor values can also be calculated directly from local precipitation data (Renard et al. 1997). Published isoerodent maps are the primary source of R factor values for the ATTACC model. The soil-erodibility (K) factor is the rate of soil loss per rainfall erosion index unit under standardized conditions. K factor values can be calculated from soil samples using a soil-erodibility nomograph (Wischmeier, Johnson, and Cross 1971; Wischmeier and Smith 1978; Renard et al. 1997) and algebraic approximations of the nomograph (Renard et al 1997). When K factor values are estimated from soil samples, they are extrapolated across the installation using soil maps, remotely sensed imagery, plot allocation strata, or other data sources as available. K factor values are also available with most published soil surveys from the U. S. Department of Agriculture (USDA) Natural Resource Conservation Service (NRCS). K values associated with NRCS soil surveys are the primary source of data for ATTACC. The soil loss tolerance (T) factor indicates the maximum level of soil erosion that will permit a high level of soil productivity to be sustained economically and indefinitely. T values are based on soil depth, rooting depth, soil organic matter reduction, and plant nutrient losses. T factor values are available with most published soil surveys from the NRCS. T factor values for the ATTACC model are generally obtained from NRCS...
