

## Statistical Guide to Data Analysis of Avian Monitoring Programs: Biological Technical Publication

By U S Fish Wildlife Service

Createspace, United States, 2015. Paperback. Book Condition: New. 279 x 216 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This Guide is intended to provide guidance to field biologists wishing to analyze data collected on terrestrial bird populations, as part of an avian population monitoring program. A second objective is to provide information that will help biologists design such programs. The audience is similar to that for the Handbook of Field Methods (Ralph et al. 1993), the Monitoring Bird Populations by Point Counts (Ralph et al. 1995), and in many ways this Statistical Guide to Data Analysis of Avian Monitoring Programs can be a useful complement to the field methods handbook. At the same time, we feel this Statistical Guide can be of use to field biologists studying other organisms besides terrestrial birds. In our view, all field biologists will benefit from taking the equivalent of 2 or 3 semester courses in statistics and we assume that readers of this guide have completed at least this basic level in statistics.

### Reviews

*This publication is amazing. It is definitely basic but shocks in the fifty percent of your publication. You won't feel monotony at any time of your own time (that's what catalogues are for concerning if you question me).*

-- Prof. Kirk Cruickshank DDS

*This kind of book is every little thing and taught me to look ahead of time and a lot more. I am quite late in starting reading this one, but better than never. I found out this book from my dad and I encouraged this PDF to find out.*

-- Justus Hettinger
