

TEACHERS' PERCEPTIONS OF STUDENT BEHAVIORS DURING TESTING

By Deborah Landry

VDM Verlag Mrz 2009, 2009. Taschenbuch. Book Condition: Neu. 220x150x10 mm. This item is printed on demand - Print on Demand Neuware - The purpose of this research was to examine the effects of standardized testing on student behavior as perceived by their teachers. The study consisted of an online survey of 63 teachers and four individual interviews. Participants in the study were 63 teachers in grades kindergarten through fifth grade from two northeastern Oklahoma elementary school districts, and from a local university affiliate of a National Writing Project. Each participant completed an online survey. Four teachers were interviewed, two from an urban district and two from a suburban district. The methodological framework was a qualitative, hermeneutic phenomenological approach to human science. Six themes emerged from the data analysis. The themes identified included the following: (1) teacher memories of testing, (2) helplessness, (3) accountability and curriculum, (4) community, (5), nurturing, and (6) changes. The study found teachers perceived many changes in student behavior during testing; teacher memories of testing impact role of nurturing during testing; and the classroom physical environment changes during testing. 172 pp. Englisch.

Reviews

This publication may be really worth a go through, and a lot better than other. It really is written in simple terms and never difficult to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Natalie Abbott**

This book will not be simple to get going on reading but extremely exciting to read through. Yes, it can be playful, still an interesting and amazing literature. I am very easily could possibly get a delight of reading a written book.

-- **Rene Olson**
