

Handbook on the Neuropsychology of Aging and Dementia

By Ravdin, Lisa D. / Katzen, Heather L.

Book Condition: New. Publisher/Verlag: Springer, Berlin | This book offers a hands-on guide to identifying dementia. It details special considerations for conducting neuropsychological assessments and illuminates symptoms associated with specific disorders and their relationship to functional impairments. | With the aging of the baby boomers and medical advances that promote longevity, older adults are rapidly becoming the fastest growing segment of the population. As the population ages, so does the incidence of age related disorders. Many predict that 15% - 20% of the baby-boomer generation will develop some form of cognitive decline over the course of their lifetime, with estimates escalating to up to 50% in those achieving advanced age. Although much attention has been directed at Alzheimer's disease, the most common form of dementia, it is estimated that nearly one third of those cases of cognitive decline result from other neuropathological mechanisms. In fact, many patients diagnosed with Alzheimer's disease likely have co-morbid disorders that can also influence cognition (i.e., vascular cognitive impairment), suggesting mixed dementias are grossly under diagnosed. The Clinical Handbook on the Neuropsychology of Aging and Dementia is a unique work that provides clinicians with expert guidance and a hands-on approach to neuropsychological practice with older...
